

PORCELAIN PAVERS, 3/4" THICK

Course Description

This course was put together to describe the characteristics of 3/4" Inch Thick Porcelain Pavers, a line of product that is perfectly suited for the outdoors (or wherever superior technical characteristics and safety is required). The market's demand for a stain proof, slip resistant, chemical resistant, no maintenance product led to the development of a revolutionary aesthetically superior product that is versatile enough for exteriors as well as interiors. The combining of the highest level of quality control, with state of the art equipment and age old practices, has led to an offering of a superior industry leading product. Porcelain Pavers offer a never before seen dimension to the outdoor living area!

Learning Objectives

1. Understand the Characteristics of Porcelain Pavers
2. Understand the Various Destinations of Use of Porcelain Pavers
3. Learn the many ways of how Porcelain Pavers can be laid directly on grass, gravel or sand
4. Learn the many ways of how Porcelain Pavers can be installed over reinforced concrete, over decking and on raised floors
